Regional Transmission Deviation Account of DICs of Northern Region for the for the billing Month of January 2023

(billing period of November 2022)

Provisions as per CERC (Sharing of ISTS Charges and losses) Regulations, 2020:

1. Regional Transmission Accounts and Regional Transmission Deviation Accounts for the billing month for the DICs shall be prepared by the Secretariat of the respective Regional Power Committee on the basis of:
 - a. DIC-wise transmission charges for the billing month, as furnished by the Implementing Agency; and
 - b. Meter readings of all Special Energy Meters for computation of Transmission Deviations for every time block of the corresponding billing period, as furnished by respective RLDCs.
2. Regional Transmission Accounts and Regional Transmission Deviation Accounts shall be issued by the Secretariat of respective Regional Power Committee to DICs, the Central Transmission Utility and inter-State transmission licensees and also be displayed on the website of respective Regional Power Committees.
3. Secretariat of the respective Regional Power Committee shall issue Regional Transmission Accounts and Regional Transmission Deviation Accounts by the end of the month following the billing period.

Methodology adopted for calculation of RTDA as the said Regulations:

4. Transmission Deviation, in MW, in a time block is computed as under:

Type of DIC	Transmission Deviation
For a Generating Station	Net metered ex-bus injection- (LTA + MTOA+ STOA)
For a State	Net metered ex-bus injection- (LTA + MTOA)
For any drawee DIC	Net metered ex-bus injection- (LTA + MTOA+ STOA)

Where:

- LTA - Long Term Access;
- MTOA- Medium Term Open Access
- STOA - Short Term Open Access
- DIC - Dedicated ISTS Customer

5. Transmission Deviation Rate, in ₹/MW

$$1.05 \times \frac{(\text{Transmission charges of state in billing month})}{(\text{LTA} + \text{MTOA of state}) \times 2880}$$

Transmission Deviation Rate so derived is applicable to the respective State and any other DIC embedded in that state.

6. *Transmission charges for Short Term Open Access shall be payable by generating stations and embedded entities located in the State.* However, the same are recovered in the form of Transmission Deviation Charges in case of States.

7. **Special cases:**

- a. *For a hydro-generating station, overload capacity of 10% during peak season shall be taken into account.* As such, LTA quantum used for calculation of RTDA is increased by 10% for High Demand Season months declared by NRLDC.
- b. Drawl of start-up power by Generating stations from ISTS is considered as Transmission Deviation and charged at Transmission Deviation Rate for the State in which they are located.
